WORK EXPERIENCE

LTM (LTIMindtree)

Aug 2025 – Present

Software Engineer

Pune, India

- Developed and maintained FastAPI backend services and React.js frontend components using Next.js and Redux for state management and context handling, contributing across application development and delivery.
- Improved application performance by optimizing legacy database queries, reducing response time from 15 seconds to 5 seconds (**67% improvement**).
- Developed and maintained integrations with SOAP-based services within SOA architecture and performed integration testing to validate communication between enterprise applications and backend systems.
- Developed and maintained automated tests using Pytest, Jest, and React Testing Library (RTL), optimizing test workflows and reducing test-suite execution time to **25%** of the original runtime.
- Worked in Agile/Scrum teams and collaborated with cross-functional teams while supporting and troubleshooting applications across development, testing, integration, and production environments. Leveraged Codex for AI-assisted programming and debugging.
- Applied object-oriented programming principles and data structures and algorithms to develop maintainable application components and solve backend problems efficiently.

Ramanujan Universe

Jun 2024 – Jul 2024

High Performance Computing Research Intern

Noida, India

- Participated in stock price prediction and implemented C++ multithreading using OpenMP to accelerate model training.
- Eliminated a 51% system bottleneck by profiling and streamlining data serialization layers.
- Prepared technical documentation covering implementation details, performance optimizations, and testing workflows.

EDUCATION

Jaypee University of Engineering and Technology

Jul 2021 – Jun 2025

Bachelor of Technology in Computer Science and Engineering | CGPA 8.7

Guna, MP, India

TECHNICAL SKILLS

Languages: C, C++, Python, Java, Go, SQL

Libraries/Frameworks: React.js, Next.js, Redux, Node.js, FastAPI

Tools/Platforms: Git, GitHub, Docker, Sentry, CI/CD

Databases: MySQL, PostgreSQL, DynamoDB, Redis, AWS Aurora

ACADEMIC AND PERSONAL PROJECTS

LinkSnip – Distributed URL Shortener Platform | *FastAPI, AWS Cloud Services* | [GitHub](#) | [Live](#)

Apr 2026 – Jul 2026

- Architected a decoupled write path using API Gateway and Load Balancers to scale short-code generation.
- Optimized GET redirects by serving destination mappings from CDN edge locations, minimizing origin requests and redirect latency, while building the frontend using React.js, Next.js, and Redux.
- Engineered a real-time analytics pipeline using **AWS Kinesis** and **DynamoDB** to process tracking data off-path.

Clinic Management System API | *Go, Gin, PostgreSQL, Redis, JWT* | [GitHub](#)

Jan 2026 – Mar 2026

- Developed a Go REST API using Gin for doctor, receptionist, and patient management, applying object-oriented design principles with clean architecture and the Repository Pattern.
- Implemented JWT authentication and role-based access control to secure API endpoints.
- Integrated Redis for session caching and API rate limiting, improving application scalability.

ERP Artifact Automation System | *FastAPI, Next.js, Celery, Redis, PostgreSQL* | [GitHub](#) | [Live](#)

Oct 2025 – Nov 2025

- Built FastAPI backend with OData APIs and **OAuth 2.0** authentication to manage artifacts and system operations.
- Leveraged Celery with Redis as the message broker to handle asynchronous background tasks.
- Integrated CI/CD pipelines using Jenkins, automating testing, deployment, and delivery processes.

CERTIFICATIONS & ACHIEVEMENTS

AWS Certified Developer - Associate

AWS Certified AI Practitioner

Solved 1,200+ problems across multiple competitive programming and coding platforms.
